AIR-TO-WATER HEAT PUMP **THERMAV™**

NATURAL HEATING MACHINE

Catalogue 2011

LG Electronics' **Eco-friendly** Technology

LG Electronics' environmental policy is centered on its "Life's Good When it's Green" program. The program is divided into two areas: pre-production and post-production. LG Electronics' goal is to reduce greenhouse gases in the pre- and post-production stages by 150,000 tons and 30,000,000 tons, respectively, by 2020. This reduction of greenhouse gases emitted during a product's life cycle (including raw materials used in production, product distribution, product usage, and product disposal) will be carried out in stages.

LG Innovation Natural Heating Machine

THERMA V, Natural Heating Machine, Aiming at all-in-one Solution

Economical : According to its innovative technology and advanced performance efficiency, THERMA V offers one of the highest cost-saving and payback with any heating system in the market!

Flexible : A solution that is easy to install and does not require constant house renovations.

Natural : THERMA V respects the environment by using two renewable energy sources, the air and the sun, and by reducing CO₂ emissions.

Government Subsidy : According to recent trends, the adoption of renewable energy, the heat pumps may enable consumers to obtain a government subsidy under certain conditions.

What is THERMA V?

The Solution for New Housing and Renovation

THERMA V is specially conceived to respond to the needs of the renovation market (to relieve or replace a boiler) and the new housing market. The product adapts perfectly to individual and collective residential applications. Moreover, this Air-to-Water heat pump makes up an eco-friendly product that uses two renewable energy sources – the air and the sun. Finally, it proves economics with Coefficient of Performance (COP) up to 4.5, among the most advanced on the market.

- Different heat transmitters :
 - > Underfloor Heating
 - > Radiators (Low Temperature Radiators)
 - > Fan Coil Units
- Optional Accessories :
 - > Sanitary Water Tank

A Natural Solution

- Economical system with advanced Coefficient of Performance : COP = 4.5
- Utilization of two renewable energies: Air and sun.
- Reduced CO₂ emissions compared to gas or fuel heating.

A Flexible Solution

- Monovalent operation :
THERMA V is capable of responding to all of your daily comfort & energy needs.
In addition, if the outdoor temperature decreases below the seasonal temperature, a backup electric heater will come to guarantee your optimal well-being.

Application : Replacing Coventional Boiler

• SPLIT

• MONOBLOC

- Alternative Bivalent Operation :
THERMA V heat pump can also be integrated in the installation of existing boiler(gas or fuel).
Boiler takes over space heating and sanitary hot water, in case of severe low ambient temperature.

Application : Using Existing Boiler

• SPLIT

• MONOBLOC

Benefits of THERMA V

Energy Performance

Advanced Coefficient of Performance (COP) for More Energy Saving

As generating energy from outdoor air even in low temperature, THERMA V makes it possible to heat efficiently. With inverter technology of LG, THERMA V can make higher efficiency level up to the range of 4.1 to 4.5. In other words, consuming 1kW of electric energy of an electrical network enables more than 4kW of heating energy.

Respecting the Environment

Reducing CO₂ Emissions

The THERMA V solution by LG adopts two renewable energies, the air and the sun. This eco-friendly system will decrease CO₂ emissions from heating systems on fossil energies such as gas and fuel.

Solar Panels

THERMA V

Source : Eurelectric

Inverter regulation, for more serenity

Once the desired temperature is achieved, unlike conventional air to water heat pump that turns the compressor on and off, LG inverter units adjust and constantly vary the compressor speed to maintain the desired temperature with minimal fluctuation to ensure that your comfort is not compromised.

Benefits of THERMA V

Convenient Control

- Control of the generation of heating, hot water
 - Weekly scheduling
 - Operating modes
 - Water temperature
 - Heating emergency operation

Heating Emergency Operation

Heating is essential during winter. THERMA V is equipped with an emergency operation that allows the maintenance of heating in case of possible failure.

The heating security mode consist of two levels the indoor:

- Level 1 : When the indoor unit slightly malfunctions, the outdoor unit operates under a pre-defined emergency operation mode.
- Level 2 : When outdoor unit malfunctions, electronic heater of the indoor unit operates under a pre-defined emergency operation mode.

Anti-Corrosion Gold Fin™

The exchangers of our outdoor unit are treated against corrosion and pollution. This treatment guarantees the durability of the systems and high-level performance.

> Salt Spray Test for 15 Days

After 15 days

Easy Installation

Hydrokit

Integrated Grips

Separated Shut-off valves

Outdoor Unit

- Refrigerating connection is possible in three directions

1 Direction

3 Direction

Jacking-up Grips

- Easy to manipulate thanks to the integrated grips

Facilitated maintenance

- Access to vital parts of the machine thanks to the new removable front panel fixed with three screws.

Easy access to compressor

3 fixation screws

Benefits of THERMA V

V2 Injection technology adopted by THERMA V Split offers you most comfortable atmosphere in extreme cold weather condition by providing 100% heating performance at -15°C without an auxiliary heater or boiler. Therefore, it saves users electricity cost greatly (Peak data result with heating steady-state without defrost effect at the test condition of A*/W35)

100% performance at -15°C without electric heaters

A Compelling Reason to Use LG V2 Injection

100% stable & constant heating down to -15°C (THERMA V provides 100% comfort at any condition even down to -15°C without an auxiliary heater)

75% heating performance at -20°C

Save electricity consumption and save electricity bill

Eco-friendly

Inverter technology offers ultimate comfortable environment

Constant Heating - V2 Injection Technology

Effects of V2 Injection technology

Expansion of THERMA V operating range

Heating capacity increase

Split V2 Injection : Logic - Functioning

Heating capacity Increase - V2 Injection Rotary compressor

Cycle Diagram

LG conducted a real field test in Norway to secure reliability at severe low temperatures.

An Indoor Box for MONOBLOC 3ø

THERMA V Indoor Box

The indoor box contains an electric backup heater and a water pump.

The traditional MONOBLOC includes an electric back-up heater and a water pump in the outside unit. LG's '3-phase' MONOBLOC puts the water pump in the indoor box so that it keeps the water pump from being frozen as it is installed inside the building separately. It also generates additional heat energy with an electric back-up heater.

LGRTV200VE	198 LITERS
LGRTV300VE	287 LITERS

SANITARY WATER TANK – SINGLE COIL

SANITARY WATER TANK		LGRTV200E	LGRTV300E
GENERAL CHARACTERISTICS			
Water Volume	L	198	287
Diameter	mm	580	580
Height	mm	1230	1680
Empty Weight	kg	45	59
Tank – Materials		Stainless steel	Stainless steel
Outer Skin – Materials		Paint Epoxy	Paint Epoxy
Color – White RAL		White NC	White NC
CHARACTERISTICS OF ELECTRICAL BACK-UP			
Additional Electric Heater	kW	3	3
Adjustable Thermostat	°C	60 – 90	60 – 90
CHARACTERISTICS OF EXCHANGER			
Exchanger Type		Single	Single
Material Exchanger		LDX 2101 – Stainless steel	LDX 2101 – Stainless steel
Maximum Water Temperature	°C	80	80
HYDRAULIC CONNECTIONS – HEAT PUMP			
THERMA V Entry	mm	25	25
THERMA V Exit	mm	25	25
HYDRAULIC CONNECTIONS – SANITARY WATER			
City Water Entry	mm	22	22
Hot water Exit	mm	22	22
ELECTRIC CONNECTION			
Supply	ø/V/Hz	1ø/220-240V 50Hz	1ø/220-240V 50Hz
MANDATORY OPTIONAL ACCESSORIES			
Sanitary Tank Installation Kit		PHLTA	PHLTA

SANITARY WATER TANK – DOUBLE COIL

SANITARY WATER TANK		LGRTV200VE	LGRTV300VE
GENERAL CHARACTERISTICS			
Water Volume	L	198	287
Diameter	mm	580	580
Height	mm	1230	1680
Empty Weight	kg	50	64
Tank – Materials		Stainless steel	Stainless steel
Outer Skin – Materials		Paint Epoxy	Paint Epoxy
Color – White RAL		White NC	White NC
CHARACTERISTICS OF ELECTRICAL BACK-UP			
Additional Electric Heater	kW	3	3
Adjustable Thermostat	°C	60 – 90	60 – 90
CHARACTERISTICS OF EXCHANGER			
Exchanger Type		Double	Double
Material Exchanger		LDX 2101 – Stainless steel	LDX 2101 – Stainless steel
Maximum Water Temperature	°C	80 (With an Heat Pump)	80 (With an Heat Pump)
HYDRAULIC CONNECTIONS – HEAT PUMP			
THERMA V Entry	mm	25	25
THERMA V Exit	mm	25	25
HYDRAULIC CONNECTIONS – SANITARY WATER			
City Water Entry	mm	22	22
Hot water Exit	mm	22	22
ELECTRIC CONNECTION			
Supply	ø/V/Hz	1ø/220-240V 50Hz	1ø/220-240V 50Hz
MANDATORY OPTIONAL ACCESSORIES			
Sanitary Tank Installation Kit		PHLTA	PHLTA

SOLAR PANELS FOR DOUBLE COIL TANK

For better performance and energy saving, it is possible to combine the THERMA V heat pump with solar panels.

Flexible Application for New Housing

Application 1

> Monovalent operation mode

> Functions :

- Underfloor Heating • Low Temperature Radiators
- Generation of Sanitary Hot Water: Heat pump + Additional Electric Tank

Application 2

> Monovalent operation mode

> Functions :

- Underfloor Heating • Low Temperature Radiators
- Generation of Sanitary Hot Water: Heat pump + Additional Electric Tank + Solar Panels

Warning :

The recommended installation schemes are provided as a rough guide and are not a substitute for thorough hydraulic research performed by a professional based on the house's characteristics. LG is not responsible for damage resulting from not following this warning.

Application 3

> Monovalent operation mode

> Functions :

- Underfloor Heating

Application 4

> Monovalent operation mode

> Functions :

- Low Temperature Radiators

Warning :

The recommended installation schemes are provided as a rough guide and are not a substitute for thorough hydraulic research performed by a professional based on the house's characteristics. LG is not responsible for damage resulting from not following this warning.
